DESCRIPTION

Opsens Solutions' OPP-B, Optical MEMS-based designed for demanding applications. The OPP-B model is a bare fiber optic pressure sensor (**no metal housing**) for applications requiring minimally invasive in-situ pressure measurement.

The OPP-B pressure sensor is compatible with all Opsens Solutions' WLPI (Patent #7,259,862) signal conditioners. With the inherent advantages of fiber optic, it is **not subject to interference** from electromagnetic interference, vibrations and lightning that may be present in the sensing environment.

The OPP-B sensor delivers **long term accuracy, durability, low drift and high fidelity pressure measurements** in the harshest environments such as **EMI, RFI, high voltage, combusive/explosive and high temperature.**

This compact and very robust probe can be customized to specific customer requirements. The fiber optic extension cable can be as long as 3 kilometers.

APPLICATIONS

- Geotechnical applications
- In-situ pressure monitoring in food processing
- Harsh subsurface monitoring equipment
- Aerospace and Defense
- Static or dynamic pressure measurements conducted in confined spaces
- Pressure monitoring in pumping stations
- Hazardous and nuclear environments
- High temperature environments
